

# README Generator

License MIT

## Description

This README Generator takes user input from the command line and produces a professional [README.md](#) file.

## Table of Contents

- [Install](#)
- [Usage](#)
- [Contributors](#)
- [Testing](#)
- [Questions](#)

## Install

There is no need to install this application.

## Usage

To use the README Generator users will be given a series of questions to be answered. The questions include: the title of the project, the license the project is operating under, a brief description of the project, how to install the application, a detailed description of how to use the application, who the contributors were, whether any testing has been done, and, if so, which tests, and when they have been run, and finally, a place for any user questions for the developers.

## Contributors

Davis Ransom @davis.ransom.tech@gmail.com

## Testing

No formal testing has been performed on this application as of 11/11/2021.

## Questions?

Will there be any upgrades to this application in the near future?
